

Claims.

- 5 1. An accessory for a writing board, a file or the like,
at least consisting of a holder which can be provided
to a file or the like , whereby this holder works in
conjunction with or can work in conjunction with a
binding mechanism of the type comprising elements
10 over which documents that are provided with openings
can be threaded on the one hand, and whereby this
holder can be manually attached to a file or the like
on the other hand.
- 15 2. The accessory according to claim 1, wherein the
holder can be fixed to the file or the like with the
help of means.
- 20 3. The accessory according to claim 1, wherein the
above-mentioned binding mechanism is a mechanism of
the type which is provided with rings having a
predominantly rigid shape, consisting of at least two
parts provided on a base element and which can be
moved between an open and a closed position.
- 25 4. The accessory according to claim 1, wherein the
holder is U-shaped and can be provided over the file
or the like in a clamping manner.
- 30 5. The accessory according to claim 1, wherein the
binding mechanism is mounted fixed on the holder.

6. The accessory according to claim 1, wherein the binding mechanism is mounted on the holder in a replaceable manner.

5

7. The accessory according to claim 1, wherein the means which allow to fix the holder to a file or the like consist of detachable connecting means which allow for a removal and possibly a re-use.

10

8. The accessory according to claim 1, wherein the means consist of a snap-in connection.

15

9. The accessory according to claim 1, wherein the holder comprises a part made as a supporting plate, designed to lie against a part of the file or the like, whereby the above-mentioned binding mechanism is or can be mounted on this part.

20

10. The accessory according to any of claim 1, wherein the above-mentioned means, the holder respectively, are configured such that this holder can be fixed over the edge of a rigid wall part of a file.

25

11. The accessory according to claim 10, wherein the holder is made in the shape of a predominantly U-shaped body, such that it can be pushed over the edge of a rigid wall part of a file thanks to this U-shaped design.

30

12. The accessory according to claim 1, wherein the holder is provided with locking means which make it possible to keep the holder in its position in relation to the file.

5

13. The accessory according to claim 12, wherein locking means consist of one or several parts which can mesh in an opening, in openings respectively in a wall part of the file.

10

14. The accessory according to claim 13, wherein the above-mentioned part, the above-mentioned parts respectively, are provided on an elastically bendable part, bendable parts of the holder respectively, such that the first-mentioned parts are forced into the above-mentioned openings when provided to a file.

15

15. The accessory according to claim 11, wherein the above-mentioned part, the above-mentioned parts respectively, are provided on one or several elastically bendable parts forming the leg of the aforesaid U-shape which is situated opposite to the leg which works in conjunction with the binding mechanism or can work in conjunction with it, and wherein the aforesaid part, the aforesaid parts respectively, consist of a pin, pins respectively, which can work in conjunction with openings in a file.

20

25

16. The accessory according to claim 14, wherein the above-mentioned part, the above-mentioned parts

30

respectively, are provided on one or several elastically bendable parts forming the leg of the aforesaid U-shape which is situated opposite to the leg which works in conjunction with the binding mechanism or can work in conjunction with it, and wherein the aforesaid part, the aforesaid parts respectively, consist of a pin, pins respectively, which can work in conjunction with openings in a file.

17. A writing board, file or the like, being equipped with a holder and a binding mechanism, as described in any of the preceding claims.

18. A writing board, file or the like, comprising provisions, in particular openings or the like, which make it possible to equip said file or the like with an accessory as described in any of claims 1 to 3.

19. The writing board, file or the like according to claim 14, whereby it concerns a file or the like of the type consisting of a front wall part, a rear wall part connected thereto by means of a back part and at least one inwardly folded flap formed on one of the aforesaid wall parts, which is held at a distance from the accompanying wall part via side pieces, whereby the holder is mounted on the free edge of the flap and whereby, near this free edge are at least provided means for providing such a holder on it.
